

Abstract Example

Example of Abstract Format for Undergraduate Life Science Research Symposium

Sebastian Z. Ramos¹, Elizabeth Connor², Department of Biology
University of Massachusetts, Amherst, MA 01003

This mock abstract is intended to give you an example of the type of abstract you can submit for the UMass Undergraduate Life Science Research Symposium being held on April 23, 2008. The abstract deadline is April 11. You must keep your abstract to less than 350 words. The abstract should be single-spaced, in Times New Roman 12-point font, full-justification, one-inch margins and contained in a single paragraph with no indents. Special characters and mathematical notations should be kept to a minimum to avoid translation problems. You will be able to upload your abstract in either a word or pdf file right on our website. Please browse our “Suggestions on Poster Presentation Guidelines” to help you prepare for your posters. Please remember that if your abstract is longer than 350 words, it may not be printed on the abstract booklet. The booklet will be available to all during the poster session. The Symposium Committee looks forward to receiving your abstract and to your participation in the symposium. (~160 words)
